Discontinuation of Service Support for Product Line BIG / TIG Analog

Dear valued Customer,

We herewith inform you that we have made the decision to **discontinue the service support** for our Product Line **BIG / TIG Analog (analog display)** effective **April 1st, 2025**.

Example: BIG and TIG with analog Display

We understand that this decision may impact your operations and we apologize for any inconvenience caused. Due to obsolete key components and restrictions in spare parts availability it is no longer feasible for us to maintain support while meeting our quality standards.

We remain committed to supporting you during this transition period until April 1st, 2025. Service to function cannot be guaranteed, due to given restrictions in parts availability. After this period, we will no longer be able to offer any service support.

To assist you in finding an alternative solution, please reach out to us and consider our latest **TruPlasma** and **TruHeat** product generations as potential replacements. Our team would be delighted to support and ensure a smooth transition for your operations.

Thank you for your understanding and continued support. We appreciate the opportunity to have served you and look forward to a continued partnership. Should you require any further assistance, please do not hesitate to contact us: service.electronic@trumpf.com.

Sincerely,

TRUMPF Hüttinger GmbH + Co. KG
